

WHAT IS STOP MOTION ANIMATION?

*During the “WHAT IS STOP MOTION ANIMATION?” preparation stage, the teacher must read more about stop motion animation before the activity in order to understand it better because simply by showing images and text alone won't make a good activity.

*During the “WHAT IS ANIMATION AND HOW TO MAKE IT” preparation stage, when explaining stop motion animation, if possible, gather more knowledge about specific type of animation so children could understand differences and similarities better. And also during intro stage about animation teacher could have a discussion with students about animation.

*During the “WHAT IS ANIMATION AND HOW TO MAKE IT” preparation stage, when explaining and watching about stop motion studio program it would be best for teacher itself to test apps before the activity.

*During the “WHAT IS ANIMATION AND HOW TO MAKE IT” preparation stage, when watching “STOP MOTION ANIMATION CREATION PROCESS” when showing video, sometimes stop and explain some things that are shown in the video.

CREATING STOP MOTION ANIMATION

* During the “CREATING STOP MOTION ANIMATION” implementation stage, the teacher must give enough time for students to complete animation. Stop motion animation creation process is not so complex but it takes time.

*During the “CREATING ANIMATION” implementation stage, when explaining the task, teacher could use animation that he/she made based on the task so children could understand better if the task can be completed.

*During the “CREATING ANIMATION” implementation stage, teacher should explain more about what stone age it so students could draw a better comparison.
