

What is a cube?

Name

Let's have some fun exploring the properties of a cube! Follow the instructions below and use your wooden or plastic cube to answer the questions

Let's try to draw it

Observation

Look closely at your cube. What shape do you see on each side? Draw a picture of one of the sides here:

How many sides (faces)
does your cube have?

How many edges does
your cube have?

Let's find the corners of the cube. How many corners
(vertices) can you count on your cube?

Measurements

Use a ruler or measuring tape to measure the length of one side of your cube. Write down the measurement here

cube the same length? **YES / NO**
Are all the sides of your

The left side must
incorporate your name
into the design

On the right side be creative and
choose another symbol and
draw it over and over on this square
(pizzas, hearts, emojis, leaves,
bubbles, baloons,
etc.)
