

### **Additional resources for the teacher**

The scenario portrays the direct relationship and interaction between the inhabitants of the city of Arta and its forest. It highlights the contribution of the forest ecosystem to the daily life and survival of the city's residents.

The presentation includes entertaining games, thematic animations, environmental messages, and photos from both the forest and the city. Children actively participate throughout the presentation. The script concludes with experiential learning and relaxation, such as a picnic, in the nearby forest.
